

SJE Level Monitor™ CL

With a glance, see the level in your tank! The SJE Level Monitor™ CL system is a convenient way to monitor your tank level by utilizing a scalable LED bar graph to represent the level as a percentage of a full tank. The adjustable alarm is easy to set using the alarm level and set buttons on the touch pad. As the liquid level reaches the installer-specified alarm setpoint, the audible alarm is activated. The alarm can be silenced using the test/silence button.

- Alarm with adjustable setpoint is easy to install and set
- Can be calibrated for tanks ranging from 12 - 40 inches
- Utilizes the innovative, floatless C-Level™ sensor
- Standard C-Level™ sensor cable lengths of 20, 40, 80, 200 feet; additional lengths available to allow monitoring of tanks up to 300 feet away
- 10 segment LED bargraph displays tank level
- Test/silence button
- Alarm level button
- Set button
- Power on and alarm indicators
- Auxiliary contacts (normally open and normally closed)
- Can be configured as high level, low level or no alarm
- Three-year limited warranty
